BIOLOGY FIRST · DATA OVER DENIAL

A 12-seat Fellowship cohort · Print double-sided: Action Log = your data, Notes & Insight = your reflection.

aafiends.com · racefiends.com · aivirus.org

VERSION BETA 1 · LATEST AT aafiends.com/90rr

The 3-Pillar System

We do not treat the obsession of the mind alone. We rebuild the biological vessel underneath it. Three systems — worked together, every day — hold a single day of sobriety. Miss one leg and the stool tips over.

SURRENDER + D.O.S.E. + COMMUNITY = 1 DAY SOBER

LOWER CORTISOL · EARN YOUR OWN DOPAMINE · BREAK ISOLATION

1 THE ENGINE

BODY · HARDWARE

Your body is the hardware the addiction ran down. Stabilize it first — a calm nervous system can finally run the spiritual software.

- Sleep, light & movement
- Fuel & hydration
- Pain & recovery signals

2 THE NETWORK

COMMUNITY · SOCIAL

Addiction is a disease of isolation. Meetings, a sponsor, and reaching for people flood the system with oxytocin — the buffer against cravings.

- Meetings & the rooms
- Sponsor / Vanguard calls
- Service & outreach

3 THE MIRROR

SPIRIT · MIND

An honest daily read that strips the ego out of self-evaluation. Surrender what you cannot control; check the loops before they run you.

- Stillness & surrender
- Ego / resentment check
- Gratitude & clarity

BASELINE INTEGRITY — 1 DAY SOBER

SCORE ALL THREE AS YOUR VSE (VANGUARD SCORE) OUT OF 10 — THE NUMBER, NOT YOUR MOOD.

9-10 Optimal
Peak repair mode.

7-8 Stable
Minor friction.

5-6 Alert
Check your inputs.

< 5 Redline
High risk — call someone now.

HOW TO USE THIS JOURNAL

- 1 pillars.
Each morning — open today's Action Log, fill in the date, then tick what you do across the three
- 2 At night — score your day 0–10 at the bottom of the Action Log, then land the day on the facing Notes & Insight page.
- 3 Every 7 days — total your week on the Kernel Check. Watch the trend, adjust one thing, keep going.

MY PLEDGE — ONE DAY AT A TIME

Just for today, I will work all three pillars, stay honest, and not pick up. One day at a time is the whole system — I only have to hold today.

THE CHEMISTRY

D.O.S.E. — Earn Your Four Chemicals

D.O.S.E. is the four chemicals behind almost everything that feels good. The substance faked all four at once — recovery is teaching your body to make its own again, in small, clean doses.

DOPAMINE + OXYTOCIN + SEROTONIN + ENDORPHINS

FOUR SYSTEMS THE SUBSTANCE FAKED — NOW YOU REBUILD EACH ONE YOURSELF

D DOPAMINE REWARD · DRIVE · FOCUS

Reward and drive. You burned it out chasing the high — now earn it back in small, clean hits.

EARN IT Finish a hard thing · cold · daylight

O OXYTOCIN BONDING · TRUST · SAFETY

The bonding chemical, and your buffer against the next craving. Isolation starves it.

EARN IT Meetings · a real call · service

S SEROTONIN MOOD · CALM · CONTENTMENT

Your steady baseline mood — about 90% of it is made in the gut, not the brain.

EARN IT Gut-friendly food · sun · sleep

E ENDORPHINS PAIN RELIEF · EUPHORIA

Your built-in painkiller and natural high — paid for with effort, not a bottle.

EARN IT Hard exercise · laughter · heat

KNOW THE ENEMY — THE PLEASURE-PAIN BALANCE

The A.I.V. doesn't invent a new pleasure — it hijacks these four. One hit floods all of them harder than anything you can earn. To survive that surge your brain does the only thing it can: it down-regulates its own receptors — and the internal scale that balances pleasure against pain tips hard toward the pain side.

1 Artificial flood → 2 Receptors down-regulate → 3 Balance tips to pain

So every borrowed high is repaid with an equal low — the comedown, the craving, the flat gray days. Chase it again and the deficit only deepens, until you're using just to feel normal.

The way back: earn D.O.S.E. in small, clean doses. Given time the scale re-levels — and ordinary life starts to feel good again.

DAY — · NOTES & INSIGHT

The 90-Day Game Plan

Recovery here is an engineering project on a 90-day horizon, mapped to how your brain chemistry actually heals. This workbook is Month 1 — The Reset. Months 2 and 3 use the exact same daily pages; the protocol simply deepens as your baseline comes back online.

WHAT HELD THE LINE

WINS • WHAT WORKED • WHAT ALMOST DIDN'T

PHASE 1 - RESET

- Days 1-30**
- Survive withdrawal, stabilize the nervous system, heal the gut-brain lining, lock your sleep clock.
- Day 1 – Sanctuary: clear the supply
 - Day 3 – Deepest deficit
 - Day 4 – Gut reset begins
 - Day 7 – Body / spine maintenance
 - Day 14 – Circadian lock
 - Day 30 – GABA repaired

PHASE 2 · RESTRICTURE

- Days 31–60 — The boredom milestone
 - Day 60 — The boredom milestone
 - Steps 4–5 — The honest audit
 - Day 45 — Zone 2 conditioning
 - Day ~40 — Step-down of props
 - moral inventory.
 - own dopamine returns, run the
 - reintroduce conditioning as your
 - Step down the crutches,
 - Solidify natural reward, restore relationships, finish the repair until the baseline holds on its own.
 - Day 70 — Sleep normalized
 - Day 80 — Joy / serotonin returns
 - Steps 8–9 — Amends loop
 - Day 90 — The Clearance
 - Days 61–90

PHASE 3 · RECALIBRATE

- Days 61-90**
- Day 70 – Sleep normalized
 - Day 80 – Joy / serotonin returns
 - Steps 8–9 – Amends loop
 - Day 90 – The Clearance

THE 12 STEPS, ACROSS THE 90 DAYS

Steps 1-3 · Reset

Admit you're powerless
over it, come to believe a
power greater than you can
help, and decide to let go.

Steps 4-7 · Restructure

Take a searching, honest inventory, share it, and become willing to let the old defects go.

Steps 8-9 · Recalibrate

List those you've harmed
and begin making direct
amends.

Steps 10-12 · Every day

Daily inventory, prayer / meditation, and carrying it to others. This journal is your Steps 10 & 11.

WHY 90 DAYS

By roughly Day 90 the dopamine, serotonin and stress systems have recalibrated enough to hold without white-knuckling. Days 61–90 largely repeat the Day 31–60 rhythm — which is why one monthly workbook, run three times, carries the whole journey.

KNOW THE ENEMY

The A.I.V. — One Virus, Many Faces

We do not treat addiction as a moral failing. It behaves like a virus — the Addiction Intelligence Virus — an adaptive infection of the brain's reward system. Alcohol, opioids, nicotine, gambling, porn, sugar, endless scrolling: the surface differs, the mechanism is identical. It floods dopamine, forces the brain to down-regulate its own receptors, and soon you need it just to feel normal.

WHAT IT FEEDS ON

- Stress / cortisol

Every spike is a meal.
- Resentment

Old anger it turns into thirst.
- Ego / control

"I've got this" is the setup.
- Isolation

Alone, your own voice lies to you.
- Secrecy / shame

What stays hidden grows.
- Boredom / restlessness

An empty hour it rushes to fill.

THE FIREWALL — THREE PILLARS STARVE IT

The Engine calms the nervous system so stress stops feeding it. The Network breaks the isolation it needs. The Mirror drains the secrecy and ego it runs on. Worked daily, they cut off its food.

MEET THE VIRUS ACROSS ITS VECTORS

Scan to see every form it takes — and the BIO 12 firewall that starves it.

Why it Works — The Science

Nothing in this Journal is a chore for its own sake. Every item is aimed at repairing a specific part of the system the substance broke down. Here is the "why" behind the "what."

- Engine - body
- Network - people
- Mirror - spirit
- Data - meta

The Data itself	Addiction thrives on denial and story. Structured numbers — sleep, pain, meetings, cravings — strip the ego out and show you an honest baseline. Data over denial.
Sleep	Deep sleep clears metabolic waste and rebuilds GABA (your natural brake). Protect it and the cravings, anxiety and fog all ease.
Morning light	10-15 min of outdoor light early sets your body clock: a clean dopamine bump now, melatonin on time tonight.
Hydration & minerals	Early recovery depletes water and electrolytes fast. Water with a pinch of salt stabilizes blood volume, energy and mood before caffeine.
Fermented / gut food	Up to ~90% of your serotonin is made in the gut. Rebuilding the microbiome with fermented foods helps restore calm, steady mood.
Protein & omega-3	Provide the raw materials (tyrosine, choline, fats) to rebuild dopamine and the brain-cell membranes stressed by heavy use.
Cold / contrast	A short cold exposure gives a large, clean dopamine and adrenaline lift for hours — teaching the brain to earn its 'up' without a substance.
Zone 2 movement	Easy aerobic movement (you can still talk) upregulates dopamine, drains stress hormones, and rebuilds the body without spiking cortisol.
Pain & decompression	Stress dumps cortisol, which inflames the body's weakest link (often the low back / sciatic nerve). Gentle decompression catches a stress spike early.
Meetings & service	Isolation spikes cortisol and cravings. Sitting in a room and helping others releases oxytocin — a biological buffer against the next urge.
Surrender / stillness	Handing over what you cannot control shifts you out of fight-or-flight, lowering the cortisol that feeds the craving loop.

WHY IT WORKS

Why Community & a Higher Power

The body pillar is obvious. These two are where people quit — and they are exactly the two that keep you sober. Here is why neither is optional.

WHY COMMUNITY

THE NETWORK

Addiction is a disease of isolation. Alone, the mind uses your own voice to talk you back out — and you'll believe it. In a room of people who've been there:

- You can't lie the way you lie to yourself — honesty gets easier.
- Connection releases oxytocin, a biological buffer against the next craving.
- You borrow their strength on the days yours runs out.
- Someone is expecting you — accountability you can feel.

WHY A HIGHER POWER

AS YOU UNDERSTAND IT

You do not need religion. You need one idea: you are not the highest power in your life. Self-will and ego are what got us here. Handing the wheel to something bigger lowers the stress (cortisol) that feeds the craving loop — and lets you stop white-knuckling.

Your God could be:

The group

Nature

The universe

Truth

Love

The program

Good Orderly Direction

Your future self

God, as your faith describes

The 3 Daily Musts

ONE DAY AT A TIME

- Set down the ego — you are not running the universe.
- Connect with at least one person — a meeting, a call, a text — reach out.
- Rely on a power greater than you — hand over the wheel, just for 24 hours.

DAY . NOTES & INSIGHT

Vipassana — Ride the Wave

THE MIRROR • COME HOME TO THE BODY

A craving isn't a command — it's a wave moving through your body. It rises, it peaks, and if you don't feed it, it falls on its own. The practice is simple: sit still and watch the wave instead of reaching for a drink. Your body already knows how to settle. You're just learning to feel it happen.

90 sec how long a feeling's body-surge really lasts

20–30 min a craving peaks, then fades on its own

500+ free guided sits • Decutler The Mind app

15 MIN DAILY MINIMUM

- Sit tall. 3 slow breaths. Set a timer.
- Watch your breath — cool in, warm out.
- Scan your body, head to toe. Just notice.
- One breath. Tick the Mirror box.

FREE TOOLS — START TONIGHT
Decutler The Mind — free app or YouTube — has guided Vipassana and body scans, no ads. No voice? Just a timer and the four steps above. Your wandering mind is normal; noticing it wander IS the practice.

BRING IT BACK TO THE BODY
You're not fighting yourself — you're listening. Stack it on the morning: after the plunge, sit. On a hard day, one slow breath still counts — never zero, never miss twice. Every sit says: I can be still.

30 MIN DEEPER RESET

- Settle in. Let the body get still.
- 10 minutes just on the breath.
- 13 minutes scanning the whole body, slow.
- Rest in the quiet. One kind wish.

THE ENGINE · MOVE IT THROUGH THE BODY

Yoga & Walking — Meditation in Motion

Stress and cravings don't just live in your head — your body holds them. Moving lets them out. A gentle stretch and a walk loosen what's stored, calm your system, and make your own feel-good chemicals the slow, steady way your body is built for. Vipassana sits still; this one moves — same practice, same goal.

SLOW BEATS SPIKE — YOUR BODY'S NATURAL FLOW

+27%
GABA — your calm brake — after one
yoga session

20 min
an easy walk that resets your mood

\$0
the whole practice costs nothing

A SIMPLE 15-MIN MORNING FLOW

- Slow, breathing through each. You're waking the body, not performing — no flexibility needed.
- Child's Pose — 5 slow breaths, arrive
 - Cat–Cow — 8 rounds, wake the spine
 - Down Dog → step to a low lunge, both sides
 - Stand, fold forward, then reach up tall
 - Seated twist + figure-4 for the hips (sciatica)
 - Lie back, 5 breaths — done

THEN WALK IT OUT

- The other half of the dose. A flow and a walk together are a full moving meditation.
- 20–30 min, outside, phone in your pocket
 - Easy pace you could talk at
 - Match your breath to your steps
 - Let your eyes rest far, not on a screen
 - Morning light = extra clean energy
 - Finish a little clearer than you started

Preps & Tools — Set Yourself Up

A few simple things make the daily reps far easier. Gather what you can before Day 1 — you don't need all of it, and none of it has to be fancy.

GEAR TO HAVE

CHECK WHAT YOU'VE GOT

- ☐ Apple cider vinegar (ACV) + sea salt — morning hydration
- ☐ A watch — Garmin / Apple / Whoop / Oura for sleep & HRV
- ☐ A simple scale — a weekly body check
- ☐ A groceries run (list below)
- ☐ Good pens you actually enjoy — you write here daily
- ☐ A quiet spot for meditation / prayer

PROTOCOLS & TIPS

Sleep-tracking tip
A Garmin / Whoop / Oura turns "I slept okay" into real data — hours, wake-ups, and HRV (your recovery gauge). Log those numbers on the Action Log each morning.

The Power-Nap Protocol
Afternoon crash? Set a 36-minute alarm: ~5 minutes to fall asleep + ~30 minutes of real rest. Longer and you wake up groggy.

The 6 AM meeting
If you can, anchor your day with an early (6 AM) meeting. It sets the tone, front-loads your connection, and starts the streak before the day gets away.

STARTER GROCERIES

GUT · DOPAMINE · CALM

Fermented foods (kefir, yogurt, kimchi) · eggs · fatty fish or omega-3 · leafy greens · berries · bone broth · sea salt & electrolytes · plenty of water. Skip the energy drinks and heavy sugar — they spike, then crash you.

WANT THE FULL PREP LIST?

Scan for the detailed kit — recommended apps, walking shoes, electrolytes & salts, and the grocery staples that steady mood and sleep.

WHY

DAY — NOTES & INSIGHT

Your Safety Always Comes First

YOUR SAFETY COMES FIRST

If your VSE drops below 5 for two days in a row, or if you are thinking about using to escape pain, harming yourself, or disappearing — this is not a journaling problem. This is a call.

STEP 1 Use the call list you wrote on page 7. Someone in the network picks up.

STEP 2 If no one answers, call or text 988 immediately (Suicide & Crisis Lifeline).

STEP 3 Log in at aaffends.com — your Vanguard can be notified you need support.

DETOX CAN BE DANGEROUS — DO NOT DO IT ALONE

If you are detoxing from alcohol, benzodiazepines, or opioids, withdrawal can be life-threatening. Medical supervision can be lifesaving — talk to a doctor or call SAMHSA before stopping on your own.

988 Lifeline • SAMHSA 1-800-662-4357 • Text HOME to 741741 • Emergency 911

FREE • CONFIDENTIAL • 24/7 — YOU ARE WORTH THE CALL

This journal supports your recovery. It does not replace treatment, therapy, or medical care, and it is not affiliated with or endorsed by Alcoholics Anonymous World Services, Inc. Aaffends.com is not a crisis service and cannot provide emergency support.

MONTH AT A GLANCE

Month at a Glance

Map your 30 days: mark meetings, milestones and appointments, and shade every day you stay sober. Seeing the whole month keeps the momentum visible.

Month

Sobriety date

SUN	MON	TUE	WED	THU	FRI	SAT

Tip: write the day-number (1–30) in each box and add a ✓ when you finish that day's page. Circle your milestones (Day 7, 14, 30).

Count Your Days — Keep the Chain

Sobriety is counted one day at a time, and watching the number grow is its own medicine. Each morning, write today's number in the SOBER · DAY box on your daily page, then shade one square below. Don't break the chain.

My sobriety date

Today is Day #

1	2	3	4	5	6	7	8	9	10	11	12	13	14
15	16	17	18	19	20	21	22	23	24	25	26	27	28
29	30	31	32	33	34	35	36	37	38	39	40	41	42
43	44	45	46	47	48	49	50	51	52	53	54	55	56
57	58	59	60	61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80	81	82	83	84
85	86	87	88	89	90								

Milestones to watch for — Day 1: 24 hours · Day 3: the hardest is passing · Day 7: one week · Day 14: the clock is resetting · Day 30: your brakes (GABA) rebuilt · Day 60: the boredom milestone · Day 90: the Clearance.

This starter carries your first 7 days — the chain runs to 90. Reserve your seat (back cover) and pick up the full monthly workbook to keep the streak alive.
