HOW IT WORKS

The 3-Pillar System

We do not treat the obsession of the mind alone. We rebuild the biological vessel underneath it. Three systems — worked together, every day — hold a single day of sobriety. Miss one leg and the stool tips over.

SURRENDER + D.O.S.E. + COMMUNITY = 1 DAY SOBER

LOWER CORTISOL · EARN YOUR OWN DOPAMINE · BREAK ISOLATION

1 THE ENGINE

BODY · HARDWARE

Your body is the hardware the addiction ran down. Stabilize it first — a calm nervous system can finally run the spiritual software.

- Sleep, light & movement
- Fuel & hydration
- Pain & recovery signals

2 THE NETWORK

COMMUNITY · SOCIAL

Addiction is a disease of isolation. Meetings, a sponsor, and reaching for people flood the system with oxytocin — the buffer against cravings.

- Meetings & the rooms
- Sponsor / Vanguard calls
- Service & outreach

3 THE MIRROR

SPIRIT · MIND

An honest daily read that strips the ego out of self-evaluation. Surrender what you cannot control; check the loops before they run you.

- Stillness & surrender
- Ego / resentment check
- Gratitude & clarity

How to use this journal: each day is a two-page spread. Side A is your data — check off what you did across the three pillars, then score at the bottom. Side B is your reflection — meeting notes, feelings, and who you connected with. Review every 7 days.

Day 30 — The Clearance

Thirty days ago the nervous system was redlining. If you worked all three pillars, the rebound has faded, the Sanctuary is built, and the fog has thinned. This is the end of The Reset and the on-ramp to Month 2 · The Restructure.

THE GAME PLAN

The 90-Day Game Plan

Recovery here is an engineering project on a 90-day horizon, mapped to how your brain chemistry actually heals. This workbook is Month 1 — The Reset. Months 2 and 3 use the exact same daily pages; the protocol simply deepens as your baseline comes back online.

PHASE 1 • RESET

Days 1–30

Survive withdrawal, stabilize the nervous system, heal the gut-brain lining, lock your sleep clock.

- Day 1 — Sanctuary: clear the supply
- Day 3 — Deepest deficit
- Day 4 — Gut reset begins
- Day 7 — Body / spine maintenance
- Day 14 — Circadian lock
- Day 30 — GABA repaired

PHASE 2 • RESTRUCTURE

Days 31–60

Step down the crutches, reintroduce conditioning as your own dopamine returns, run the moral inventory.

- Day ~40 — Step-down of props
- Day 45 — Zone 2 conditioning
- Steps 4–5 — The honest audit
- Day 60 — The boredom milestone

PHASE 3 • RECALIBRATE

Days 61–90

Solidify natural reward, restore relationships, finish the repair until the baseline holds on its own.

- Day 70 — Sleep normalized
- Day 80 — Joy / serotonin returns
- Steps 8–9 — Amends loop
- Day 90 — The Clearance

THE 12 STEPS, ACROSS THE 90 DAYS

Steps 1–3 • Reset

Admit you're powerless over it, come to believe a power greater than you can help, and decide to let go.

Steps 4–7 • Restructure

Take a searching, honest inventory, share it, and become willing to let the old defects go.

Steps 8–9 • Recalibrate

List those you've harmed and begin making direct amends.

Steps 10–12 • Every day

Daily inventory, prayer / meditation, and carrying it to others. This journal is your Steps 10 & 11.

WHY 90 DAYS — by roughly Day 90 the dopamine, serotonin and stress systems have recalibrated enough to hold without white-knuckling. Days 61–90 largely repeat the Day 31–60 rhythm, which is why one monthly workbook, run three times, carries the whole journey.

KNOW THE ENEMY

The A.I.V. — One Virus, Many Faces

We do not treat addiction as a moral failing. It behaves like a virus — the Addiction Intelligence Virus — an adaptive infection of the brain's reward system. Alcohol, opioids, nicotine, gambling, porn, sugar, endless scrolling: the surface differs, the mechanism is identical. It floods dopamine, forces the brain to down-regulate its own receptors, and soon you need it just to feel normal.

A.I.V.
the host + the symbiote

WHAT IT FEEDS ON

- **Stress / cortisol**
Every spike is a meal.

- **Resentment**
Old anger it turns into thirst.

- **Ego / control**
"I've got this" is the setup.

- **Isolation**
Alone, your own voice lies to you.

- **Secrecy / shame**
What stays hidden grows.

- **Boredom / restlessness**
An empty hour it rushes to fill.

THE FIREWALL — THREE PILLARS STARVE IT

The Engine calms the nervous system so stress stops feeding it. The Network breaks the isolation it needs. The Mirror drains the secrecy and ego it runs on. Worked daily, they cut off its food.

MEET THE VIRUS ACROSS ITS VECTORS

Scan to see every form it takes — and the BIO 12 firewall that starves it.

WHY IT WORKS

Why It Works — The Science

Nothing in this journal is a chore for its own sake. Every item is aimed at repairing a specific part of the system the substance broke down. Here is the "why" behind the "what."

The Data itself

Addiction thrives on denial and story. Structured numbers — sleep, pain, meetings, cravings — strip the ego out and show you an honest baseline. Data over denial.

Sleep

Deep sleep clears metabolic waste and rebuilds GABA (your natural brake). Protect it and the cravings, anxiety and fog all ease.

Morning light

10–15 min of outdoor light early sets your body clock: a clean dopamine bump now, melatonin on time tonight.

Hydration & minerals

Early recovery depletes water and electrolytes fast. Water with a pinch of salt stabilizes blood volume, energy and mood before caffeine.

Fermented / gut food

Up to ~90% of your serotonin is made in the gut. Rebuilding the microbiome with fermented foods helps restore calm, steady mood.

Protein & omega-3

Provide the raw materials (tyrosine, choline, fats) to rebuild dopamine and the brain-cell membranes stressed by heavy use.

Cold / contrast

A short cold exposure gives a large, clean dopamine and adrenaline lift for hours — teaching the brain to earn its 'up' without a substance.

Zone 2 movement

Easy aerobic movement (you can still talk) upregulates dopamine, drains stress hormones, and rebuilds the body without spiking cortisol.

Pain & decompression

Stress dumps cortisol, which inflames the body's weakest link (often the low back / sciatic nerve). Gentle decompression catches a stress spike early.

Meetings & service

Isolation spikes cortisol and cravings. Sitting in a room and helping others releases oxytocin — a biological buffer against the next urge.

Surrender / stillness

Handing over what you cannot control shifts you out of fight-or-flight, lowering the cortisol that feeds the craving loop.

WHY IT WORKS

Why Community & a Higher Power

The body pillar is obvious. These two are where people quit — and they are exactly the two that keep you sober. Here is why neither is optional.

WHY COMMUNITY THE NETWORK

Addiction is a disease of isolation. Alone, the mind uses your own voice to talk you back out — and you'll believe it. In a room of people who've been there:

- You can't lie the way you lie to yourself — honesty gets easier.
- Connection releases oxytocin, a biological buffer against the next craving.
- You borrow their strength on the days yours runs out.
- Someone is expecting you — accountability you can feel.

WHY A HIGHER POWER AS YOU UNDERSTAND IT

You do not need religion. You need one idea: you are not the highest power in your life. Self-will and ego are what got us here. Handing the wheel to something bigger lowers the stress (cortisol) that feeds the craving loop — and lets you stop white-knuckling.

"One day at a time" is the practice.

Each day you do three things: set down the ego (you're not running the universe), connect with at least one person, and rely on a power greater than you. Do that for 24 hours — then do it again tomorrow. That is the whole program.

Preps & Tools — Set Yourself Up

A few simple things make the daily reps far easier. Gather what you can before Day 1 — you don't need all of it, and none of it has to be fancy.

GEAR TO HAVE

CHECK WHAT YOU'VE GOT

- ☐ Apple cider vinegar (ACV) + sea salt — morning hydration
- ☐ A watch — Garmin / Apple / Whoop / Oura for sleep & HRV
- ☐ A simple scale — a weekly body check
- ☐ A groceries run (list below)
- ☐ Good pens you actually enjoy — you write here daily
- ☐ A quiet spot for meditation / prayer
- ☐
- ☐

PROTOCOLS & TIPS

Sleep-tracking tip

A Garmin / Whoop / Oura turns "I slept okay" into real data — hours, wake-ups, and HRV (your recovery gauge). Log those numbers on Side A each morning.

The Power-Nap Protocol

Afternoon crash? Set a 36-minute alarm: ~5 minutes to fall asleep + ~30 minutes of real rest. Longer and you wake up groggy.

The 6 AM meeting

If you can, anchor your day with an early (6 AM) meeting. It sets the tone, front-loads your connection, and starts the streak before the day gets away.

STARTER GROCERIES

GUT · DOPAMINE · CALM

Fermented foods (kefir, yogurt, kimchi) · eggs · fatty fish or omega-3 · leafy greens · berries · bone broth · sea salt & electrolytes · plenty of water. Skip the energy drinks and heavy sugar — they spike, then crash you.

CURRENT INVENTORY

YOUR SAFETY COMES FIRST

Your Safety Always Comes First

If your VSE drops below 5 for two days in a row, or if you are thinking about using to escape pain, harming yourself, or disappearing — this is not a journaling problem. This is a call.

STEP 1 Use the call list you wrote on page 7. Someone in the network picks up.

STEP 2 If no one answers, call or text 988 immediately (Suicide & Crisis Lifeline).

STEP 3 Log in at aafiends.com — your Vanguard can be notified you need support.

DETOX CAN BE DANGEROUS — DO NOT DO IT ALONE

If you are detoxing from alcohol, benzodiazepines, or opioids, withdrawal can be life-threatening. Medical supervision can be lifesaving — talk to a doctor or call SAMHSA before stopping on your own.
